

Top LLM Resources

by Leonid for Staying Up-to-Date with LLM and AI Developments

LangChain

[LangChain YouTube Channel](#) In addition to how-tos and build-up use cases that you can adapt to your business challenges, you will receive new product reviews, updates, and webinars.

[LangChain blog](#) Always sends essential updates, release notes, or new video series on YouTube.

[LangChain docs](#) It's not my favorite place to visit; it feels quite disorganized, but it's an essential resource for understanding how to build LLM apps with LangChain. If you are stuck, you can chat with docs. Select Mixtral model for that, it is best so far.

Matt Wolfe

The most popular Gen AI news channel. It is more casual and brings primarily No-Code GenAI content. Matt curates [futuretools.io](#) - a collection of almost all AI tools by categories that can significantly boost your productivity. [Here's a link to Matt's YouTube channel.](#)

The Neuron

The Neuron covers all significant events in AI and related fields in a concise style. If you are short on time but want to stay updated, this resource is for you. [Link to the newsletter.](#)

AI Jason

One of my favorite AI YouTubers. He is always on point, provides excellent explanations, and has exciting cases. He recently added a few series on Agents. [Check it out.](#)

Matthew Berman

Matthew Berman successfully sold his tech startup, where he was an owner and developer, and now focuses 100% on content production. He posts regularly and covers all major events in AI and related tech fields. I respect him for his technical approach and broad topic coverage. [Here's a link to his YouTube channel.](#)

David Shapiro

David Shapiro has experience working with LLMs starting from GPT-2. How does his YT channel stand out from others? He is offering an exciting series on what the post-AGI world may look like. Check the playlists "Singularity" and "Economics of AI." [Here's the link to the channel.](#)

Awesome LLM

Awesome LLM is a curated collection of papers, frameworks, tools, courses, tutorials, and resources focused on large language models, particularly ChatGPT. [Here's the link to the repo.](#)

Liam Ottley

Liam Ottley was my favorite AI YouTuber before he focused his channel on AAA, an AI automation agency. From time to time, he still posts one of the best AI videos in terms of production and delivery. Fast pace, on-point explanations, hot topics. [Here is a link to his channel.](#)

Hugging Face

If you haven't been using the Hugging Face platform, you should start now. It is an outstanding resource for accessing datasets, running open-source LLM models, and experimenting with the Transformers library. It also offers a comprehensive blog. [Check it out.](#)
